MAY PROVE ITSELF A DREADNOUGHT IN THE
HOSPITAL'S BATTLE AGAINST DEATH, A FLAG-
SHIP THAT FIGHTS FOR LIVES OF LITTLE ONES.

EVERY CHILD IS THE LIGHT OF SOME HOME. IS THAT LIGHT TO BE PUT OUT BY THE DEATH OF CHILDREN WHOSE LIVES THE HOSPITAL CAN SAVE WITH THE HELP OF YOUR MONEY? -:- -:- -:- -:-

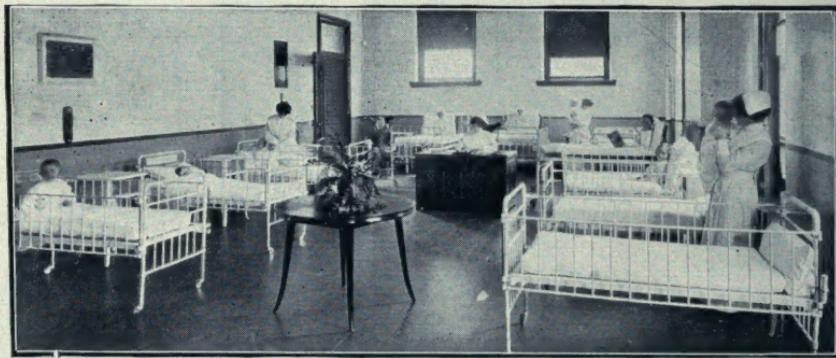

ONE OF THE BABY WARDS

Last year 758 babies were admitted. In Cubicle Wards, in the new wing, there were in September 60 babies daily.

A GROUP OF SURGICALS

These boys sleep on the open balconies of this ward—day and night. Fresh air does wonders for these patients.

THE GIRLS' MEDICAL WARD

This is a delightful ward. It has 20 cots and a large balcony at the south-east end. There were scores of cases of Chorea, Heart Disease, Rheumatism, Eye and Ear, and Pneumonia troubles in this ward last year. The results were most satisfactory.

MONEY REFUSED TO THE HOSPITAL IS MERCY RE-FUSED TO THE CHILDREN

A SICK AND SUFFERING CHILD APPEALS TO THE HARDEST HEART. IT IS NOT NECESSARY TO PLEAD FOR SICK CHILDREN, THEY PLEAD FOR THEMSELVES. -:- -:- -:- -:- -:-

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto

CASH—YOUR CASH, THE CONTRIBUTIONS OF YOUR KINDNESS, MAY KINDLE THE LIGHT OF HOPE IN THE EYES OF GRIEVING MOTHERS AND CAUSE ROSES OF HEALTH TO BLOOM IN THE PALE FACES OF SUFFERING LITTLE CHILDREN

CATARACT OF EYE
One eye cured—the other being treated. There were a number of cases in last year. Excellent results.

A GOOD LISTENER
It is the delight of the children to be read to from story books. This little one was all attention.

A GREAT PET
A club foot in plaster. There were 16 cases last year—all corrected.

EAR TROUBLE
This youngster told the nurse that she would like to be read to, that while one ear was "wrong," the other was "right."

TWO BRIGHT PETS
Heather Club Patients, Lakeside.

EVERY DAY IS A NEW CAMPAIGN, EVERY NIGHT IS ANOTHER BATTLE AGAINST THE FOES THAT ASSAIL THE LIVES OF LITTLE CHILDREN. YOUR MONEY CAN FIGHT IN THAT CAMPAIGN, YOUR DOLLARS CAN HELP THE HOSPITAL TO WIN THAT BATTLE

WILL YOU LET THE HOSPITAL BE DRIVEN FROM THE FIELD OF ITS BATTLE TO SAVE THE LIVES OF LITTLE CHILDREN FOR LACK OF THE MONEY YOU CAN GIVE AND NEVER MISS? -:- -:- -:- -:-

THE DIET KITCHEN—DIETITIAN INSTRUCTING PROBATIONERS

The probationers receive a six weeks' course in dietetics. The scientific feeding of the sick has in many cases taken the place of drugs in the treatment of disease, and the doctors' prescriptions in the matter of diet must be carried out. A Dietitian must know the chemistry of foods, study the physiology of digestion and how to apply this science to aid the doctor.

THE LAKESIDE LAWN AT ISLAND

One of the nurses entertaining a group of five patients. Many happy days are spent at the Island Home—342 patients were there from May to October, 1914. Do you realize what this outing means to the little ones?

A BALCONY PATIENT

This youngster spent most of his time on the south balcony of the Boys' Surgical Ward. It's marvellous how sleeping in the open helps the general health of patients. Each ward has an open balcony and a sunbath room.

Will You Help Us With Your Dollar?

MONEY GIVEN TO THE HOSPITAL MAKES MUSIC IN THE LIFE OF SOMEBODY'S CHILD. -:- -:- -:- -:-

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

THE HOSPITAL FOR SICK CHILDREN

A BANNER YEAR IN ITS LOVING WORK

The Story of the Battles Fought by the Armies of Life and Death in the Conflict to Save the Child Life of Ontario.

How the Armies of Life have Grappled with the Hosts of Death in the Fight for Health to Little Children.

A Booklet for Fathers and Mothers—Yes, for Every Boy and Girl in Our Homeland Province.

War and fighting? Yes, the literature of this time is written in blood and tears. That literature must be read through the smoke of burning villages in the light of blazing homes. The smoke, thank God, does not hover over the ashes of homes, and the flames do not redder the skies that smile on the land sheltered by the Union Jack.

The historian who chronicles the battle of a great war may not acknowledge his kinship with the chronicler who reports the progress of the never-ending war that has the Hospital for Sick Children as its battle-ground.

War and battles may not be the words that fall into a natural relationship to the history of the campaign of which the Hospital for Sick Children was and is the scene.

The Hospital for thirty-nine years has served as a meeting place where the Armies of Life have grappled with Hosts of Death. The life or death of thousands of little children was the issue settled by the fortunes of that war.

The outcome of the struggle decided whether the limbs of little children were to be straightened, and the lives of these children and the souls of their mothers thereby gladdened, or whether these children were to drag tortured limbs creeping to the grave over a short road of pain-racked, weary, crippled years.

The history of the battles fought in the Hospital's war, of the victories achieved by the Armies of Life in conflict with the Armies of Death can be recorded with a pen of truth dipped in the ink of many a Mother's tears of joy.

That record belongs to the literature of war history, the history that can be read in the radiance of little children's laughter, in the light of their mothers' smiles. The Hospital is the scene of battle, the arena of struggles, whose glories cannot be told in the language of dry statistics.

Dry statistics? Are the eyes of suffering little children who weep with pain, or the eyes of their gladdened mothers who weep with joy over the restoration of the children whom the Hospital ransoms from disease and death—are these eyes dry?

Then the statistics of this report are not dry, but eloquent with the triumphs of a war that has been carried on for thirty-nine years, and is still being waged, a war that in 1875 was a battle for the lives of 44 in-patients and 67 out-patients, and last year the same war had for its prizes the lives of 2,252 in-patients and 31,970 out-patients.

This 39th annual report of the Hospital for Sick Children adds one more volume to the history of the war that has been fought, and is still being fought within the bounds of the great mother hospital in College street, and of the campaigns that have their centre in The Lakeside Home for Little Children at the Lighthouse Point, Toronto Island.

Yes, this report is the history of a war in which victory crowns with the Banners of Life, not the Standards of Death, a war in which victory is measured by the number of eyes that are made to smile, not by the eyes that are made to weep; by the number of lives saved rather than by the number of lives sacrificed.

Thirty-nine years ago the first annual report of this charity was written. The story of the first year's work of its life in 1875 was easily told in a few hundred words. The results of a year would now fill a volume.

IMPROVEMENTS IN THE HOSPITAL PLANT.

The work of the Hospital has so increased year after year that its accommodation and equipment have been tested to the fullest capacity, and the Trustees determined on the extension of its buildings.

The position of the Hospital was accordingly placed before the corporation of the City of Toronto, and a request made that a by-law be submitted to the ratepayers for a grant of \$250,000, which would remodel the interior of the main building, and provide a new wing.

The by-law was submitted to the electorate, and carried by a majority of 13,000. The new wing, which includes the laundry, the heat and light plant, the pasteurizing plant, and the out-patient department, was erected, and the interior of the main building was completely re-modelled, with new operating rooms, X-ray plant, and bacteriological departments.

THE THIRTY-NINE YEARS' RECORD.

One can scarcely realize the immense amount of work involved in the conducting of a large hospital. The figures presented show an increase in patients that is hardly believable. It is doubtful if any institution of its kind can show the same amount of success as this Provincial Charity.

The progress of the Hospital may be shown in a single paragraph:—Thirty-nine years ago (1875) there were 44 in-patients and 67 out-patients. Last year (1914) there were 2,252 in-patients and 31,970 out-patients. In 1875 there were 6 cots; in 1914 there were 250 cots. In 1875 there was 1 nurse; in 1914 there were 85 nurses.

The total number of patients who have passed through the Hospital since 1875 as in-patients is 23,270, of whom 10,190 were girls and 13,080 boys; as out-patients 191,201, of whom 88,776 were girls and 102,425 boys, a grand total of 214,471; or an average of 5,499 per year.

Of the 23,270 in-patients, 17,058 were from the City of Toronto, and 6,212 from other parts of the Province. 10,989 or 47½ per cent. were cured; 7,118 or 30½ per cent. were improved; 1,718 or 7 1-3 per cent., were unimproved; 2,152, or 9 1/4 per cent., died.

ATTRACTIVE FIGURES OF THE YEAR'S WORK.

Statistics are not always entertaining reading, but they tell a story that must interest everyone who has the preservation of child life at heart.

The work of 1914 passed the record. The number of patients was greater than in any previous year, and work in every department increased.

From the 1st of October, 1913, to the 30th of September, 1914, the total number of in-patients admitted was 2,252; girls 972, boys 1,280; an increase of 604 over 1913. Medical cases 1,212; surgical cases 1,040.

The largest number of in-patients treated in any one day in 1914 was 244, the smallest number was 110; the daily average was 154.

The total number of out-patients treated was 31,970; girls 15,938, boys 16,032; an increase of 6,463 compared with the previous year.

The largest number of out-patients treated in any one day last year was 186; the smallest number was 78; the daily average was 103.

There is no hospital in the world that can show such progress in number of patients as can this charity.

It surely must surprise the reader to note that the increase in in-patients was 604 and in out-patients 6,463 over 1913.

THE RESULT OF TREATMENT IN FIGURES.

At no time in the history of our nation has the significance of safe-guarding human life and human efficiency been so impressed upon us, as at the present. We must help the boys and girls to grow up healthy men and women and unhandicapped in their childhood days.

Last year of the 2,252 in-patients treated, 839 or 37½ per cent., were discharged cured; 751 or 33 1-3 per cent., discharged improved; 149 or 6½ per cent., discharged unimproved; 326 or 14½ per cent., died; and 187 or 8½ per cent., remained in the Hospital.

Of the 326 patients who died 162 were girls and 164 were boys; 37 patients were in the Hospital less than 2 hours; 59 patients in the Hospital less than 8 hours; 108 patients in the Hospital less than 7 days; 63 patients in the Hospital less than 21 days; 17 patients in the Hospital less than 4 weeks; so that 87 per cent. of the 326 were beyond hope when admitted.

Of the 31,970 in the Out-Patient Department or Free Dispensary, the staff claim that 25,576 or 80 per cent., of those who received treatment were cured, and at least 10 per cent. were improved.

NATIVITY AND RELIGION OF IN-PATIENTS.

Of the 2,252 in-patients, 1,114 or 49 1-3 per cent., were from Canada; 539 or 24 per cent., from England; 38 or 1 2-3 per cent., from Ireland; 91 or 4 per cent., from Scotland; 22 or 1 per cent. from the United States; and the remainder, 448, or 20 per cent., from foreign countries.

Of the 2,252 in-patients, 1,591 or 70½ per cent., were Protestants; 283 or 12½ p.c. Roman Catholics, and 378 or 16½ p.c. other religions.

The Hospital for Sick Children is non-sectarian in every sense of the term. Neither creed, color nor race is a bar to admittance. Every child from any part of this Province requiring medical or surgical aid is welcome.

AGE AND SEX OF PATIENTS.

Of the 2,252 in-patients last year, 972 were girls and 1,280 boys. In 1913 there were 714 girls and 934 boys.

543 were under one year; 215 one to two; 182 two to three; 131 three to four; 129 four to five; 110 five to six; 142 six to seven; 141 seven to eight; 108 eight to nine; 116 nine to ten; 103 ten to eleven; 115 eleven to twelve; 97 twelve to thirteen; 76 thirteen to fourteen; 44 fourteen to fifteen.

DAYS' STAY IN HOSPITAL OF EACH PATIENT.

The aggregate number of days of treatment for 1914 for the 2,252 in-patients was 54,879. For 1913 for the 1,648 in-patients the days were 51,592. The average days' stay of patients in the Hospital during 1914 was 24 1-3. In 1913 the average was 32.

This average days' stay yearly is found by dividing the total number of in-patients, 2,252, into the total days' stay, 54,879, of all patients in the Hospital.

COST PER PATIENT PER DAY.

Last year, 1914, there were 2,252 patients in the Hospital for 54,879 days, an average of 24 1-3 days each, at a total cost of \$128,803.39; or the cost of each patient per day was \$2.34, or \$56.95 for the 24 1-3 days' stay of each patient.

In 1913 there were 1,648 patients for 51,592 days, an average of 32 days each at a total cost of \$101,696.18; or the cost per patient per day was \$1.97, or \$63.04 for the 32 days' stay of each patient.

The cost per patient per day is arrived at by adding all the days that each patient has been in the Hospital from Oct. 1st, 1913, until Sept. 30th, 1914, and then dividing the days into the total expenditure.

THE SURGICAL SERVICE.

The number of operations performed last year in the Hospital was 2,236; in the In-Patient Department, 682; in the Out-Patient Department, 1,554; besides a number of minor operations not recorded.

In 1913 the total number of operations performed was 1,780; on in-patients, 517; on out-patients, 1,263.

OUT-PATIENT DEPARTMENT AND FREE DISPENSARY.

The total attendance during the past year was 31,970; of whom 15,938 were girls, and 16,032 boys. The largest number of out-patients treated in any one day was 186; the smallest number 78; the daily average 103.

Of the total number 31,970 out-patients treated, there were 2,869 ophthalmic or eye; 5,328 ear, nose and throat; 1,142 orthopedic; 2,837 tubercular; 8,922 medical and 9,890 surgical; 982 at well-babies' clinic.

In the Dispensary there were 39,895 prescriptions or orders filled for both in and out-patients; for out-patients, 22,230; in-patients, 17,665, and this number includes the daily solutions, chemicals, and requisites distributed in the wards.

Comparing the figures with the previous year, there have been large increases; 6,463 in the number of attendances of out-patients; 21 in the daily average, and an increase of 1,945 in the Dispensary Prescriptions.

A PROVINCIAL INSTITUTION, NOT A LOCAL.

The records of the residence of each patient show that the Hospital is not local in its range of work. Children are received from all parts of Ontario. During the past year, outside of Toronto, 394 patients were from 210 places in Province. In 1913 there were 323 patients from 206 places in Ontario.

THE ORTHOPEDIC DEPARTMENT AND NEW APPLIANCE SHOP.

Last year, of the 2,252 in-patients who received treatment in the Hospital, 244 were treated for deformities, as follows:—18 Pott's disease, 5 knock-knees, 10 bow-legs, 3 flat feet, 16 club feet, 10 lateral curvature of the spine, 16 birth palsy deformity, 65 infantile paralysis, 4 wry neck, 11 dislocations of hip, 24 tubercular disease of knee, hip, ankle and elbow, and 62 miscellaneous. Of the 31,970 out-patients treated last year, 1,142 were orthopedic cases.

Last year the appliances made in the Orthopedic Shop for in-patients, out-patients and private patients included:—35 spinal braces, 21 hip splints, 3 knock-knees, 48 ankle braces, 50 leg supports, 65 club feet splints, 165 flat foot plates, 50 bow-leg splints, 30 night splints, 10 Thomas knee splints, 12 abdominal supports, 5 arm supports, 75 repairs for in and out-patients, 5 suspension apparatus, 12 frames for patients, 7 leather, 5 plaster and 5 aluminum jackets.

GYMNASIUM INSTRUCTION.

When the Nurses' Residence was erected, in 1907, provision was made on the fifth floor for a gymnasium, with a complete and modern outfit, and in the basement for a swimming-pool or plunge-bath.

A course in gymnastic exercises and physical instruction is included in the nurses' preliminary course, daily lessons of 30 minutes being given to different classes. The apparatus used consists of punching-bags, parallel and horizontal bars, dumb-bells, vaulting horse and travelling rings.

The swimming-pool is 30 feet by 13 feet, and holds 14,500 gallons of water. The bath is attended by the directress, who is an expert in swimming.

Corrective gymnastics are also given to both in and out-patients of the Orthopedic Service, by the instructress.

MASSAGE TREATMENT.

During the year 130 patients received massage, 90 in-patients and 40 out-patients; some were treated almost daily, making a total of 2,455 treatments.

Massage has proved a marvellous aid in the work. Excellent results were obtained in cases of malnutrition, rickets, general debility, fractures, neuritis, chorea, contractures and infantile paralysis.

X-RAY AND PHOTOGRAPHY.

The space formerly occupied by the operating-room suite has been filled with special and latest type of apparatus, and assigned for X-Ray work. It consists of main room for X-Ray apparatus, new dark room, patients' reception room, and a filing room which is most complete. A skiagraph is made in an eighth to a quarter of a second.

The records of the year show the following: 2,720 skiagraphs, 122 X-Ray treatments for different diseases, and 465 fluoroscopic examinations. The following number of radiographs taken show its usefulness in diagnosis of surgical and medical cases: 424 dislocations and fractures, 121 hip cases, 242 bone diseases, 619 chest and lung conditions, 81 foreign bodies located, and 356 miscellaneous.

THE SUMMER HOME OF THE HOSPITAL, THE "LAKESIDE."

The Lakeside Home for Little Children, at Lighthouse Point, has admitted 6,273 children since 1882.

The Home opened in 1914 on May 29th and closed October 2nd, 342 patients having been cared for and treated during the summer.

The Lakeside Home is so situated that it catches every breeze that blows north, east, south and west—and all the wind that blows from any point finds the little ones on the verandahs and on the sands.

THE TUBERCULAR PAVILION AT THE ISLAND.

In the Preventorium last summer from May to October 81 patients were cared for, 43 boys and 38 girls. Since 1910, 381 patients have been admitted. These children are sent from the Heather Club; they have been exposed to tubercular infection, but are not active cases.

This out-door Pavilion has 50 beds; is situated on The Lakeside Home grounds; and is under the direction of the Heather Club Chapter of the Daughters of the Empire, who maintain a Graduate Nurse at this branch during the summer, the Hospital supplying the Pavilion and nurses in training.

The increase in weight of the children averages from five to eighteen pounds. One nurse increased in weight seventeen pounds.

THE BOYS' SURGICAL PAVILION.

The Surgical Pavilion was erected on The Lakeside Home grounds in 1912, and has three wings, containing 50 beds. During 1914 there were 201 patients admitted to the Hospital suffering from diseases of the bones and joints. There were 82 patients in the Pavilion last year.

THE SCHOOL.

The Toronto Board of Education maintain a teacher at the Hospital, and the school proves a great factor in the physical as well as the mental development of the little patients. This year 370 patients received instruction, a daily average of 32. During the months of June and September the school work is carried on at The Lakeside Home, on the lawns and in the pavilions.

The children gave an exhibition of practical work, such as clay modelling, drawing and sewing. Later, on the announcement of war, knitting for the soldiers was added to their occupations, and yards of scarfs, comforters and wristlets were made. They forgot their own troubles working for the soldiers.

THE TRAINING SCHOOL FOR NURSES.

The growth of the Hospital in 1914 has involved a corresponding growth in the Training School. The increase is chiefly due to the enlarged field of work in the Out-patient Department and Baby Wards.

Twenty nurses were graduated in 1914, making a total of 291 graduates since the Training School was established in 1886.

There are at present in the school 85 pupils, 16 senior and head nurses, 18 intermediate nurses, 26 junior nurses, 25 probationers. The pupils receive a course in the diet kitchen and gymnasium.

Last year 405 applications were received, 90 of which were accepted, and 36 probationers entered the two preliminary classes.

The following lectures were given in 1914 by the staff:—10 for seniors, 26 for intermediates, 22 for juniors, and four lectures weekly by the Superintendent and her assistant, and lessons weekly by the masseuse, pharmacist and a resident trained dietitian, who gives a six weeks' course to probationers and superintends the culinary department and all diets, general and special.

SOCIAL SERVICE.

So there might be no overlapping in district nursing and that of the social service work of the City Medical Health Department, this part of the nurses' work of the Hospital has been reorganized under the regular city nurses.

The Out-Patient Department's work has been supplemented by the home visits of these nurses, to patients requiring to be "followed up."

The work of the district nurse lies with all classes and conditions of children; with well babies, to teach the mothers ways of preventing sickness that they may keep well; with the sick poor, to improve their surroundings and restore them to health. If she finds cases requiring Hospital treatment, she either recommends them for admission as in or out-patients.

The new room provided for the well babies' clinic has been full every Wednesday, a total of 982 visits by mothers with their babies.

THE PASTEURIZING DEPARTMENT.

The new Milk Laboratory, where all the milk used is pasteurized daily, and where formulas and prescriptions are prepared for in-patients, out-patients and individual customers, is most complete.

From October 1st, 1913, to September 30th, 1914, every day 160 gallons of milk were pasteurized; 2,000 bottles of milk distributed daily; 925 bottles of baby feedings prepared for outside babies daily, a daily average of 150. In addition to above, special prescriptions and formulas average 35 daily.

Our Laboratory not only pasteurizes milk for the entire number of in-patients, out-patients and individual customers, but institutions in the city, from the Evangelia and Riverdale Settlements and the Women's Dispensary, in the east end, to the Memorial Institute, St. Christopher House and University Settlement, in the west end, are also daily supplied.

DEPARTMENT OF PATHOLOGY AND RESEARCH.

During the year, examinations have been made by chemical, histological, bacteriological and other means, and the results have been of great assistance in the diagnosis and treatment of disease.

The figures of the work done in 1914 show the following:—2,040 blood examinations, 5,200 throat culture examinations, and 1,000 other bacteriological diagnoses; 3,500 urinalyses; 300 milk examinations; 200 lumbar punctures; 108 autopsies, and 400 pathological examinations for staff.

DENTISTRY IN THE HOSPITAL.

The Dental Department, opened in 1912, continues to be an interesting and effective feature of Hospital work. The number of in and out-patients examined, 200; treatments, 150; and fillings, 300. Patients are taught the proper method of using tooth-brushes.

NEW COTS DURING THE YEAR.

The following cots have, by the payment of \$2,000, been named in perpetuity in the Hospital in College street in 1914:—

“The John S. Moran Cot,” by bequest of the late Mr. J. S. Moran, Toronto; “The Mary Wakefield Cot,” by bequest of the late Mr. Geo. Wakefield, Toronto; “The Pilton Cot,” by bequest of the late Miss Edith Frances Hine, Toronto; “The Henry Cargill Cot,” by bequest of the late Mrs. Margaret Cargill, Cargill, Ont.; “The Mary Bain Gillies Cot,” by Mrs. Helen McEwen, Toronto; “The William D. Michael Cot,” by bequest of the late Mrs. Dinisha Michael, Toronto; “The James Robertson Cot,” by Mrs. Jane L. Robertson, Toronto.

The following cots, by the payment of \$100 per year, were named to be maintained annually in the Hospital in College street:—

“The Toronto and District Football Association Cot,” by Toronto and District Football Association (for five years); “The Live Wires of Service Cot,” by the Live Wires of Service Class, Deer Park Presbyterian Church, Toronto; “The William Frederick Cardwell Cot,” by bequest of the late Mrs. W. F. Cardwell, Toronto; “The Cadmus Literary Circle Cot,” by the Cadmus Literary Circle, Toronto; “The Toronto Saturday Night Cot,” by Saturday Night, Limited, Toronto.

The following cot, by the payment of \$500, has been named in perpetuity at The Lakeside Home, Toronto Island:—

“The Augusta Louisa Irving Cot,” by Mrs. Louis Sutherland, Montreal, Que., and Mrs. Aemilius Jarvis, Toronto.

The following cots, by a payment of \$25 a year, were named to be maintained annually at The Lakeside Home, Toronto Island:—

“The Jarvis Street Collegiate Institute Cot,” by the Jarvis Street Collegiate Institute, Toronto; “The Ekfrid Union S. S. Cot,” by the Ekfrid Union S. S. Ekfrid, Ont.; “The Tintern Place Cot,” by the Tintern Place School, Toronto; “The Brantford Alexandra School Cot,” by the Alexandra Public School, Brantford, Ont.; “The Bonar Presbyterian S. S. Cot,” by Bonar Presbyterian S. S. Toronto.

BEQUESTS IN THE YEAR.

The Trustees acknowledge, with thanks, bequests from estates of:—John Scott, Thameville, \$25; Henry Woods, Aylmer, \$137; Dr. Daniel Clark, Toronto, \$1,000; George Charlton, Toronto, \$200; Henry James, Brantford, \$250; Mrs. Margaret Watt, Toronto, \$10; Charles Durant, Chesterville, \$33.33; Mrs. Mary Clancy, Toronto, \$100; William Warren, Montreal, \$200; Mrs. Whaley, St. Mary’s, \$50; Jacob Singer, Toronto, \$1,000; Alfred Myers, Toronto, \$100; John Helm, Port Hope, \$5,000; Francis Cooper, Toronto, \$100; R. R. Newborn, New Toronto, \$27.25; Mrs. Elizabeth H. Wood, Toronto, \$250; Mrs. Mary J. Loudon, Toronto, \$100; George Coulson, Milton, \$1,000; Mrs. Esther D. Nesbitt, Toronto, \$200; Hon. George A. Cox, Toronto, \$5,000; Miss Edith F. Hine, Toronto, \$900; Richard Maloney, Toronto, \$200; C. Woodward, Toronto, \$1,422.22; S. W. McClung, Sonya, \$340; Jas. Clark, Toronto, \$191.50.

FINANCES OF THE HOSPITAL

The financial statement, on another page of this report, shows the receipts and expenditure for the year ending 30th September, 1914, the date on which the Ontario Government year closes. Public institutions receiving grants from the Province must send in their annual statements on this date, so that the Government year is the Hospital year. The receipts applied to maintenance account for the last year were \$111,680, while the expenditure on the same account was \$128,803. An increase of \$12,885 is shown in receipts and of \$27,107 in expenditure. The increase in receipts is partly accounted for by the increased grants from the city of Toronto and the amount received from municipalities in the Province outside of the city. By the recent act of the Legislature the Hospital has been placed on the dollar per head per day rate for all patients in the city and province.

The increased expenditure is due to the large increase of patients—604 in-patients and 6,463 out-patients in 1914, and these increases have necessitated many additions to the nursing staff and domestic help, and also entailed extra expenditure for medical and surgical supplies. Then food has not only gone up in price, but our fuel account has been nearly doubled owing to heating required for our new buildings, which are about as large as the original building. Notwithstanding the rigid economy exercised in every department of the work, the cost per head per day for the past year amounted to \$2.34, as against \$1.97 in 1913. It must be remembered that a Hospital for Children is a far more expensive institution to maintain than an adult General Hospital. In the baby wards alone it takes one nurse for every two babies, and when there are from sixty to seventy babies in the building, the expense account rises in proportion. Then the receipts on capital account, which includes the new buildings, furniture and furnishings, and alterations to the original Hospital building, were \$51,306, and notwithstanding the receipt of one donation of \$21,500, the Hospital still owes on this account \$105,088, plus \$10,000 on unpaid building account, or a total indebtedness of \$133,980. The Hospital as it stands to-day is, for its size, one of the best equipped in the world. It will accommodate 220 patients, and in every department the equipment is perfect, and no further extension will be needed for many years to come.

Dr. R. Bruce Smith, the Chief Inspector of Hospitals for the Government of Ontario, in his annual report, and in a special inspection made some months ago, paid a very high tribute as to the management of the Hospital in all its departments, and declared that it was one of the model Hospitals, not only of the Dominion, but of the continent.

"LEST WE FORGET!"

While the war has made many extraordinary calls upon the purses of generous citizens, the response should not be at the expense of those great Canadian charities which depend upon the liberality of the public in order to carry on their good work.

Ontario has contributed loyally to funds which ensure the dependents of brave soldiers from want, to funds to give comfort to the wounded, to funds to succor the Belgian people in their terrible hour of insultation. Yet the need of such charities as the Hospital for Sick Children has not grown less. Indeed, its expenses have increased as medical and surgical supplies have become more difficult to procure. Dependent as it is upon the voluntary contributions of the people of Ontario, it makes its annual appeal, confident that its friends—however great the other calls upon them—will not forget its need.

The Hospital for Sick Children is far removed from the zone of European conflict, but it too is fighting a good fight, to save the children of Ontario from the ever-present enemy, DISEASE. Its continued success in the fight which it has waged for thirty-nine years depends upon its being simply provided with the munitions of war. Those lie, good friends, in your pocket-book.

THIS IS OUR APPEAL—WILL YOU HELP US ?

Just remember that:

Every year is war year with the Hospital; every day is a day of battle; every minute the Hospital needs money, not for its own sake, but for the children's sake.

Will you let the Hospital be driven from the field of its battle to save the lives of little children for the lack of money you can give and never miss it ?

Every dollar may prove itself a Dreadnought in the Hospital battle against death, a flagship in the fleet that fights for the lives of little children.

A dollar or two means a small load of money out of your pocket, but it takes a load of misery out of some little life.

Do not put off until to-morrow, but send your dollar to-day.

Did you start right ? "Better late than never—better never late."

Ready money for the Hospital means ready mercy for every child in need.

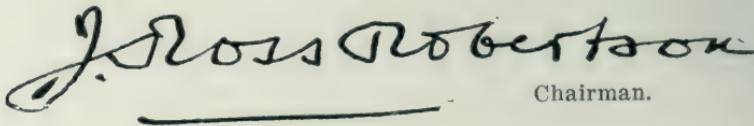

Remember that the door of the Hospital's Mercy is the door of Hope, and your dollar may be the key that opens the door for somebody's child.

"But once—I shall pass through this world but once. Any good that I can do, or any kindness that I can show to any human being, let me do it now. Let me not defer or neglect, for I shall not pass this way again."

THIS IS A GROUP OF THE FAITHFUL NURSES WHO KEPT LOVING WATCH AND WARD OVER THE TWO THOUSAND TWO HUNDRED AND FIFTY-TWO PATIENTS LAST YEAR IN THE BEDS AND COTS OF THE GREAT CHARITY IN COLLEGE STREET—NONE BETTER OF WOMANKIND IN THE WORLD. -:- -:- -:- -:- -:- -:-

A GROUP OF NURSES IN TRAINING, 1914

There are 85 nurses in the School; 16 senior and head nurses, 18 intermediate, 26 junior and 25 probationers. During the year 20 nurses were graduated, making a total of 291 graduates since the Training School was established in 1886.

A DAILY DUTY

Taking temperature in the Baby Surgical Ward—a ward with 26 cots. This colored youngster was one of the most interesting in the Hospital. So bright and pleased at the attention given her, she insisted on having her picture taken. Here it is.

WELL BABIES' CLINIC

Last year 982 babies were brought to this Hospital clinic. One of the city nurses from the Medical Health Department and a doctor from the staff attend this clinic. Think of it—nearly one thousand babies.

HELP THE HOSPITAL IN ITS MINISTRY OF MERCY
TO LITTLE CHILDREN.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to
Douglas Davidson, Sec.-Treas., College Street, Toronto

THE HOSPITAL FOR SICK CHILDREN, TORONTO.

AUDITORS' REPORT, HOSPITAL FOR SICK CHILDREN.

To the Chairman of the Trust:—Dear Sir,—We beg to certify that the Receipts and Disbursements of the Hospital for Sick Children have been carefully audited with the vouchers and bank account throughout the year ending Sept. 30th, 1914, and the accompanying statements of Income and Expenditure and Assets and Liabilities, bearing our signature, are a true and correct account of the affairs of the Hospital to that date. The books and work of the office are well looked after, and all desired information has been freely given.

Respectfully submitted,

Toronto, Oct. 10, 1914. A. C. NEFF & CO., Chartered Accountants.

THIS ENTIRE PLANT, WHICH WAS PRESENTED TO THE HOSPITAL, ENABLES IT TO FURNISH THE BEST MILK IN CANADA TO THE SICK BABIES AND YOUNG CHILDREN OF TORONTO. JUST READ THE RECORD OF ITS DAILY WORK. -:- -:- -:- -:-

Pasteurization Department

PURE MILK AT THE HOSPITAL AND HOW WE OBTAIN IT

RECEIVING THE MILK

The new Laboratory was ready January, 1914. 200 gallons of certified milk in jacketed cans are delivered at 8 a.m. from the farm. A thousand mothers get milk and feedings here during the year.

BOTTLE-WASHING MACHINES

Empty bottles, averaging 3,000 daily, washed in solution of soda to 120 deg., put through water solution at 140 deg., through vat at 180 deg., then to a live steam jet, and into baking oven at 270 deg. Fahrenheit.

MODIFICATION ROOM

This room contains modification tables, cereal kettles, water filters and sterilizers. Oatmeal, barley-flour, cane sugar and malt sugar are weighed and mixed. 925 bottles of baby feedings prepared last year for outside babies, a daily average of 150. Modification means preparing crude milk after pasteurization to bring it as near to mothers' milk as possible.

THE USE OF PASTEURIZED MILK, WHICH IS ABSOLUTELY PURE, HAS SAVED THE LIVES OF THOUSANDS OF LITTLE ONES BROUGHT TO THE HOSPITAL EVERY YEAR. NEARLY A THOUSAND OUTSIDE BABIES WERE TREATED LAST YEAR—AVERAGE ALL ROUND DAILY IS 150. -:- -:- -:- -:- -:- -:-

COMPARATIVE STATEMENT OF NUMBER OF PATIENTS RECEIVED FROM PLACES OUTSIDE OF TORONTO, 1891 TO 1914.

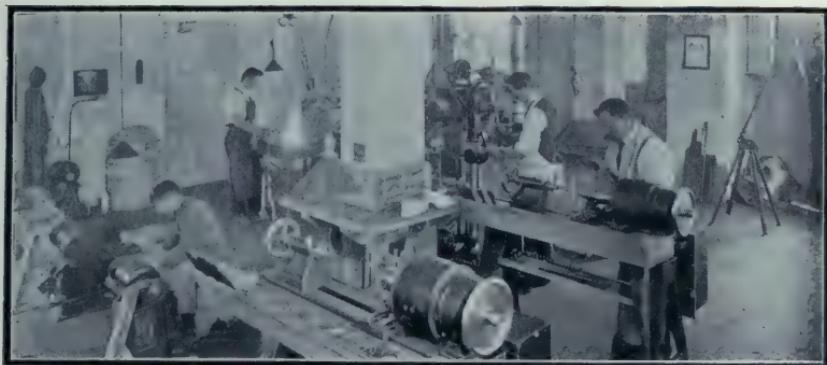

Year	No. of Places	No. of Patients	Year	No. of Places	No. of Patients	Year	No. of Places	No. of Patients
1891	27	40	1899	140	179	1907	254	378
1892	51	66	1900	188	257	1908	241	368
1893	49	68	1901	193	267	1909	267	383
1894	56	76	1902	184	236	1910	267	441
1895	70	83	1903	216	293	1911	234	384
1896	88	123	1904	196	267	1912	218	341
1897	83	118	1905	217	316	1913	206	323
1898	136	163	1906	231	331	1914	210	394

This record of especially the last twenty-four years shows that the objection parents have had to sending their sick little ones to the Hospital has been largely overcome.

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to Douglas Davidson, Sec.-Treas., College Street, Toronto.

YOUR DOLLAR MAY BE A LIGHT IN THE DARKENED CHILDHOOD OF SOME CRIPPLED BOY OR GIRL.

THE ORTHOPEDIC SHOP.

WHERE 603 SPLINTS AND APPLIANCES WERE MADE LAST YEAR

Of the 2,252 in-patients admitted last year, 244 were treated for deformities. Of the 31,970 out-patients, 1,142 were orthopedic cases.

The instruments made last year in our shop were: 35 spinal braces, 21 hip splints, 3 knock knees, 48 ankle braces, 50 leg supports, 65 club feet splints, 165 flat foot plates, 50 bow leg splints, 30 night splints, 10 Thomas knee splints, 12 abdominal supports, 5 arm supports, 75 repairs for in and out-patients; 7 leather, 5 plaster, and 5 aluminum jackets; 17 miscellaneous.

Phimosis.....	5		5	Totals.....	900	53	953

Of above, 389 were discharged cured, 442 improved, 69 unimproved, 53 died, and 87 remained in Hospital. Surgical cases, 545; medical cases, 1,112; special, 408; 187 remained in Hospital. Total, 2,252.

G. BOYER, M.B. } Registrars.

L. BRUCE ROBERTSON, M.B. } Registrars.

NOTE—A large percentage of the surgical cases discharged from Hospital as improved return to the Out-Patient Department for treatment and are ultimately cured.

SURGICAL OPERATIONS.

Table Showing Nature of Surgical Operations from Oct. 1st, 1913, to Sept. 30th, 1914.

Operations.	Total	Operations.	Total
Removal of glands of neck	1	Repair of cleft palate	11
Amputation of arm	1	Repair of mouth deformity	1
Amputation of fingers	5	Repair of wounds, tendons	11
Amputation of foot	2	Division of contracted tendon, muscle	32
Amputation of toe	1	Division of nerve	1
Fixation of joint	3	Division of bone to correct deformity	16
Circumcision	6	Tendon fixation (Gallie operation)	40
Correcting deformed urinary passage	1	Tendon lengthening or transplantation	5
Scraping of abscess	2	Appendicitis	28
Scraping of diseased bone	9	Exploratory opening of abdomen	2
Scraping of ulcer	1	Intestinal obstruction	4
Trephining	4	Telescopy of bowel	5
Examination under anaesthetic	2	Rupture of blood vessel in abdomen	1
Removal of bone of foot	7	Obstruction of stomach opening	3
Removal of malignant tumor of bone	2	General and tuberculous peritonitis	3
Removal of cyst	3	Tying arteries in goitre	1
Removal of hydrocele	2	Prolapse of rectum	6
Removal of tumor of spinal canal	1	Manipulation of feet	7
Removal of mucous tumor of lip	1	Manipulation of joint	2
Removal of cancer	1	Manipulation of shoulder	1
Removal of tumor, cheek, neck	4	Albee operation for Potts' disease	2
Removal of tooth	4	Plating fractured thigh bone	7
Removal of plate from bone	1	For contracture, following burns	2
Removal of portion ribs for pus in chest	11	Plaster jackets and spicas	29
Removal of dead bone	5	Aspiration of joint	3
Removal of kidney	1	Operation to close cavity in chest	2
Removal of kidney stone	1	Skin grafting	5
Removal of scar	1	Blood transfusions	5
Incision of abscess	31	Dilation of constriction of gullet	4
Incision of tubercular abscess	12	Examination under anaesthetic	4
Incision of inflammation of bone	14	Cauterization of mucous membrane	4
Incision of joint	3	Removal of adenoids	3
Incision for pus in kidney	1	Removal of tonsils and adenoids	26
Incision of abscess about end of bone	5	Removal of growth in larynx, nose	3
Incision of inflammatory swelling	8	Removal of foreign body	3
Incision of tendon sheath	1	Incision of larynx	1
Operation for undescended testicle	3	Incision of abscess	5
Rupture	56	Operation for inflammation behind ear	35
Reduction of fracture of collar bone	1	Reduction of fracture of nose	1
Reduction of fracture at elbow	17	Resection of deformed septum of nose	29
Reduction of dislocation of elbow	1	Scraping of diseased bone	6
Reduction of fracture of arm	11	Puncture of cavity containing pus	2
Reduction of fracture of lower extremity	38	Introduction of tube into larynx	6
Reduction of congenital dislocation hip	9	Removal of tube from larynx	1
Replacement of protruding intestines	1	Operation to close old operation wound	1
Repair of hare lip and cleft palate	2	Total	682
Repair of hare lip	17		

SURGICAL OPERATIONS IN OUT-PATIENT DEPARTMENT.

Removal of tonsils and adenoids	1183	Incising tendons (tenotomy, club feet)	24
Removal of foreign body from knee	2	Circumcisions	51
Removal of foreign body in ear	3	Curretted bone	5
Removal of foreign body in eye	1	Curretted tumor	2
Removal of foreign body in nose	3	Cauterization of corneal ulcer	3
Incising abscesses	107	Replacement of tracheotomy tube	1
Incising infected arm, hand	6	Separation of web finger	1
Incising infected leg, knee	2	Removal of stitches from cleft palate	1
Incising infected eyelid	2	Injection of bismuth to chest	1
Needling birthmarks	6	Aspiration of shoulder, chest, knee	7
Electrolysis, naevus, nose, lip	8	Extraction of teeth	1
Excision of growth—face, neck	7	Tongue-tie, severed	3
Examination of ear, nose, throat, eye	8	Incision of lachrymal duct	4
Paracentesis	23	Exploration of jaw for needle	1
Reduction of fracture of forearm	25	Examination by X-ray	1
Reduction of fracture of leg, thigh	2	Total Out-Patients	1554
Replacement of rectal prolapse	3	Total In-Patients	682
Wounds sutured	37	Total Operations for Year	2236
Amputation of joint of finger	1		
Manipulation—club feet, bow legs, arm	12		

COMPARATIVE STATEMENT OF SURGICAL OPERATIONS FROM 1891 TO 1914.

THE HOSPITAL HAS NO HANDS OF ITS OWN; THE HOSPITAL HAS NO NEEDS OF ITS OWN—IT IS THE CHILDREN'S HANDS THAT THE HOSPITAL STRETCHES OUT IN THIS APPEAL TO YOU FOR THE MONEY THAT ENABLES THE HOSPITAL TO MEET THE CHILDREN'S NEEDS. -:- -:- -:- -:- -:- -:- -:- -:-

X-RAY AND PHOTOGRAPHY DEPARTMENT

A FRACTURED LEG

Accident—Small boy run over by wagon. After dislocation was reduced by rays, plaster brace was applied to limb and hip-joint. A good result. The patient is on the table in the X-ray room.

A BROKEN ARM

An arm broken in a bob-sleigh accident. A compound fracture—one of the broken bones of arm forced right through flesh. Discharged with a sound arm. Father and mother delighted.

LAST YEAR'S RECORD.

X-Ray Treatments, 122; Skiagraphs, 2,720; Fluoroscopic Examinations, 465.

PATIENTS RADIOPHOTOGRAPHED.

121 Hip Cases; 81 Foreign Bodies; 242 Bone Diseases; 619 Chest Conditions; 315 Fractures; 109 Dislocations; 356 Miscellaneous.

MASSAGE A GREAT AID

MASSAGING A LEG

Massage given to stimulate the muscles of the leg.

MASSAGING AN ARM

A baby with Rickets, receiving massage to increase circulation.

In cases of malnutrition, infantile paralysis, rickets, fractures and neuritis—2,455 treatments given last year to in and out-patients.

CAN THE HOSPITAL LEAVE THE WOUNDED, THE DISEASE-STRICKEN, CRIPPLED CHILDREN, TO PERISH ON THE BATTLE-GROUND OF LIFE ? -:- -:- -:- -:- -:- -:- -:-

NURSES, PHYSICIANS AND SURGEONS ARE THE THREE GREAT DIVISIONS IN THE ARMY OF THE HOSPITAL'S MERCY—THE ARMY THAT IS ALWAYS FIGHTING TO SAVE LITTLE CHILDREN FROM DISEASE AND DEATH. -:- -:- -:- -:- -:-

OUT-PATIENT DEPARTMENT AND FREE DISPENSARY.

THE WAITING ROOM—WHERE ANXIOUS FATHERS AND MOTHERS WAIT WHILE THE PATIENTS TAKE THEIR TURN IN THE DAILY CLINICS

This is the busy spot in the Hospital work. Here you see a large waiting room, with seats for 200, filled with parents and their little ones, and in front of those facing you is the corridor which leads to the medical and surgical clinic rooms, and medical treatment room.

25,507 OUT-PATIENTS IN 1913 AND 31,970 OUT-PATIENTS IN 1914.

THE DISPENSARY

Last year 39,895 prescriptions were filled for In and Out-patients.

ENTRANCE AND EXIT

Out-patient Department in Elizabeth Street. Forty baby carriages waiting.

THERE IS ONLY ONE ANSWER TO THIS QUESTION: WILL YOU SAVE A DOLLAR OR TWO OF YOUR OWN MONEY, OR WILL YOU LET YOUR MONEY SAVE A LIFE OR TWO IN THE FAMILIES OF OTHER PEOPLE'S CHILDREN? -:- -:- -:- -:-

Cases treated	2,837
Well Babies' Clinic	982
Total	31,970

YOUR DOLLARS CAN BE VOLUNTEERS — EVERY DOLLAR GIVEN BY THE FRIENDS OF THE HOSPITAL SERVES AS A VOLUNTEER WITH THE COLORS UNDER WHICH THE HOSPITAL'S ARMY OF MERCY, SURGEONS AND PHYSICIANS, FIGHT TO STRAIGHTEN THE Crippled LIMBS OF LITTLE CHILDREN, TO CURE THEIR ILLS AND SAVE THEIR LIVES. -:- -:- -:- -:- -:-

THE LAKESIDE HOME FOR LITTLE CHILDREN TORONTO ISLAND.

WEST FRONT OF THE LAKESIDE
The photo man gathered one afternoon last August a group of 40 patients on the velvet lawn at The Lakeside Home. These youngsters were all convalescent and ready for home.

THE HEATHER CLUB PAVILION
The Pavilion or Preventorium on the grounds of The Lakeside Home, where war is waged against the White Plague. These children have been exposed to it, but not infected.

DOLLARS OR DEATH ? EVERY DOLLAR GIVEN TO THE HOSPITAL HELPS TO DELIVER A CHILD FROM DEATH. WILL YOU REFUSE A DOLLAR TO SUCH A CAUSE ? -:- -:- -:- -:- -:- -:-

LOYAL YOUNG CANADIANS

Five boy patients on a balcony at The Lakeside, knitting mufflers and wristlets for the soldiers of the Empire. Forty mufflers and thirty pairs of wristlets were knitted this summer by twenty boy patients.

BOYS' SURGICAL PAVILION

Eighty-two boys suffering from diseases of bones and joints spent the summer in this out-of-door Pavilion. The Pavilion has 50 beds and is fitted up with a large dining-room, kitchen and bathrooms.

SUPPORT THE HOSPITAL FOR THE SAKE OF THE CHILDREN,
FOR THE HOSPITAL MUST SERVE AND SAVE. -:- -:- -:- -:-

THE POWER OF THE PURSE—YOUR PURSE MAY BECOME THE HOSPITAL'S POWER IN THIS HOLIEST OF WARS AND NOBLEST OF BATTLES—THE BATTLE AGAINST PAIN AND DISEASE AND DEATH, A WAR TO SAVE THE LIVES OF LITTLE CHILDREN.

THE DENTAL DEPARTMENT.

In and out-patients examined, 200; treatments, 150; fillings, 300.

WONDERFUL RESULTS IN HARE-LIP CASES

These are three cases out of 21 that were admitted to the Hospital last year:

BEFORE

BEFORE

BEFORE

AFTER

AFTER

AFTER

From 1875-1914—356 Cases—273 Had Perfect Correction.

IF YOUR EAR IS DEAF AND YOUR POCKET IS CLOSED TO THE CRY OF THE HOSPITAL'S NEED, LITTLE CHILDREN MUST BE LEFT TO PERISH AMONG THE WOUNDED AND DYING ON THE BATTLEFIELDS OF LIFE. :-: :-: :-: :-: :-: :-: :-:

THE HOSPITAL MUST CEASE FIGHTING IF YOU
CEASE GIVING. HOW CAN THE HOSPITAL CEASE
FIGHTING WHEN THOUSANDS OF LITTLE CHILDREN
ARE CALLING FOR THE HELP YOUR MONEY AND
THE HOSPITAL'S MERCY CAN GIVE? :- :- :- :- :-

SOME GLIMPSES OF HOSPITAL WORK

LOADING A DINNER WAGON IN
THE MAIN KITCHEN

ARRANGING THE DINNER TRAYS
IN A WARD PANTRY

MOTHER HOSPITAL, COLLEGE ST.
There were 2,252 patients admitted in
1914; an increase of 604 over 1913.

THE NEW WING, ELIZABETH ST.
The ground floor is for Out-patients,
who had 31,970 treatments in 1914.

*Your dollars can deeds of kindness do,
To children whose needs cry out to you.*

IT IS NOT THE CRY OF THE HOSPITAL—IT IS THE
CRY OF THE CHILDREN, THE CHILDREN, THE CHILD-
REN WHO ARE READY TO PERISH, IT IS THE CRY
OF THE CHILDREN THAT GOES OUT IN THIS APPEAL
TO YOU. :- :- :- :- :- :- :- :- :-

Please remit your donation to J. Ross Robertson, Chairman of the Board, or to
Douglas Davidson, Sec.-Treas., College Street, Toronto

SPECIAL TO READERS—Please note, this report is perforated, so that leaves can be
separated and distributed to Public and Sabbath School Children.
